Profile Summary

I have hands-on experience across a wide range of technologies including C, Python, Java, JavaScript, TypeScript, C# (.NET), React, React Native, Flutter, Node.js, Express.js, FastAPI, HTML, CSS, Tailwind CSS, Bootstrap, Redis, PostgreSQL, and MS SQL.

I build scalable and modern applications by integrating RESTful APIs, leveraging CI/CD pipelines, and deploying projects with Docker, Nginx, Git, GitHub, and Vercel.

I work comfortably in Linux environments (Ubuntu & Kali) and utilize tools like Visual Studio Code, IntelliJ IDEA, Visual Studio 2022, Oracle VM VirtualBox, and VMware Workstation Pro. I also collaborate using Figma, Trello, and Microsoft Office, ensuring smooth project communication and delivery.

I am also the Founder of MyHomeTeck, a startup focused on innovative rental tracking systems that aim to revolutionize the property management industry. Through this startup, I have developed my entrepreneurial skills, embraced challenges, and transformed ideas into practical, technology-driven solutions. My approach is based on creativity and innovation, ensuring that every project I undertake adds meaningful value.

Work Experience

Piri (Istanbul, Turkiye)

Back End Developer | May 2025 – Present

- I am contributing to backend development processes in a project supported by “İşBu” and covered by a confidentiality agreement. I work with Python (FastAPI) and PostgreSQL, focusing on API development and database management. And I’m also **Team Lead** at Piri’s Backend team.

Loyalcare App (Baku, Azerbaijan)

Flutter Developer | April 2025 – Present

- Contributed to the development of a mobile application offering accessible and user-friendly psychological support services, using Flutter to create responsive and engaging user interfaces.

Mozena (Denizli, Turkiye)

Full Stack Developer | March 2025 – May 2025

- Developing scalable, high-performance, and user-friendly applications for modern software needs.
- **Backend:** Building RESTful services using **FastAPI** with async support and automatic Swagger documentation.
- **Frontend:** Creating dynamic and interactive user interfaces with **React**, leveraging its component-based architecture.
- **Mobile:** Developing cross-platform mobile apps for both iOS and Android using **React Native**.
- **Database:** Managing complex data structures efficiently with **PostgreSQL** for robust data integrity and advanced querying.
- **Cache & Queue:** Optimizing application performance and handling temporary data processing with **Redis**.
- **Infrastructure:** Containerizing services and orchestrating the development and deployment environments using **Docker Compose**.
- **Server & Routing:** Strengthening infrastructure with **Nginx** for reverse proxying, static file serving, load balancing, and secure HTTPS traffic management.

MyHomeTeck

Founder & Software Developer (Self-employed) | December 2024 – Present

- Founder & Software Developer at MyHomeTeck, a web-based platform designed to simplify rental management for landlords.
- Currently in development, MyHomeTeck focuses on lease tracking, payment management, automated notifications, and financial reporting—all in one place.
- I lead product development and collaborate with a UX/UI Designer and Graphic Designer to create an intuitive and efficient experience for property owners.

POLO PLUS Makina R&D Consultancy (Denizli, Turkiye)

Software Developer (Micorservices) Intern | June 2024 – October 2024

- Gained hands-on experience in microservices architecture, enhancing my understanding of scalable and efficient software systems.
- Developed proficiency in Docker for containerization, implemented various integrations on Linux Ubuntu environments, and worked with HAProxy to optimize load balancing and ensure high availability.
- Additionally, contributed to the development of a chatbot using Java, designed to enhance artificial intelligence capabilities.
- This internship provided me with a solid foundation in modern software infrastructure, AI-driven solutions, and scalable system design.
- Developed an AI-powered education platform
- Part of a TÜBİTAK 1501-supported national project

Collabify.ai (Chicago, Illinois, USA)

Backend Developer Intern | July 2024 – September 2024

- Participated in the development of a restaurant application
- Used React Native, Node.js and Express.js for backend functionality
- Collaborated with a team of designers and developers

Technical Skills

React | React Native | Flutter | Tailwind CSS | TypeScript | Node.js | JavaScript | FastAPI | Python | C | CI/CD | C# (.NET) | RESTful API | PostgreSQL | MS SQL | Redis | Docker | Haproxy | Nginx | Git | GitHub | HTML | CSS | Express.js | Vercel | Flutter | React Native | Ubuntu Linux | Kali Linux | Visual Studio Code | Visual Studio 2022 | Figma | Trello | IntelliJ IDEA | Oracle VM Virtualbox | VMware Workstation Pro | Microsoft Office

Volunteering

Community Volunteers Foundation (TOG)

Archive department | Oct 2024 – Mar 2025

- Organized photos, videos, and participant lists via Google Drive

Denizli Coders

Product & Project Developer | January 2025 – May 2025

- Developed web and mobile projects, and provided software training to students

Languages:

Turkish: Native

Azerbaijani: Native

English: B1

Russian: A2

Hobbies / Interests

Since 2019, I have been interested in beatmaking and music production using FL Studio. Outside of programming, I enjoy creating music, exploring personal development content, and embracing a minimalist lifestyle.
